## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 27 May 2008 has been entered.

### ***Examiner's Amendment***

2. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. Authorization for this Examiner's amendment was given in a telephone interview with Dr. Sungho Hong on 15 August 2008.
4. The application has been amended as follows:

## **CLAIMS**

- **Claim 5 (line 6)** – please delete “sensed”.
- **Claim 12 (line 6)** – please delete “sensed”.
- **Claim 15 (line 4)** – please delete “a code of”.

Art Unit: 2622

- **Claim 15 (line 6)** – please delete “a code of”.
- **Claim 15 (line 11)** – please delete “a code of”.
- **Claim 15 (line 13)** – please delete “a code of”.

***Allowable Subject Matter***

5. **Claims 1, 2, 5, 7 – 9, 12, 14, and 15 (now respectively renumbered 1 – 9)** are allowed.
6. The following is an Examiner’s statement of reasons for allowance:

The closest prior art discloses an image sensing apparatus that includes a display designating unit that determines whether an image display device, separate from the image sensing apparatus, is connected to the image sensing apparatus such that when it is determined that image display device is connected to the image sensing apparatus, the cumulative image sensing area that is kept for further processing is different from the image sensing area that is kept for further processing when it is determined that image display device is not connected to the image sensing apparatus.

However, the closest prior art does not teach or fairly suggest a display designating unit that determines whether an image display device is in an image display ON state or in an image display OFF state, wherein in an image display ON state the image display device display an image signal output from an image sensor and in an image display OFF state the image display device does not display the image signal output from the image sensor, further wherein in the image display ON state the image signal read out from the image sensor comprises a larger second sensing area than the image signal, in the first sensing area comprising a plurality of consecutive lines, read out when the image display device is in the image display OFF state.

Art Unit: 2622

7. Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Cited Prior Art***

8. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure for the following reasons:

- **US 6,882,369 B1** discloses an image sensing apparatus that performs a contrast computation for focusing on a image signal from the image sensor in every case that the image sensing apparatus is in an optical viewfinder mode or electronic viewfinder mode.
